

ECLIPSE AEROSPACE

1ST SERIAL PRODUCED JET

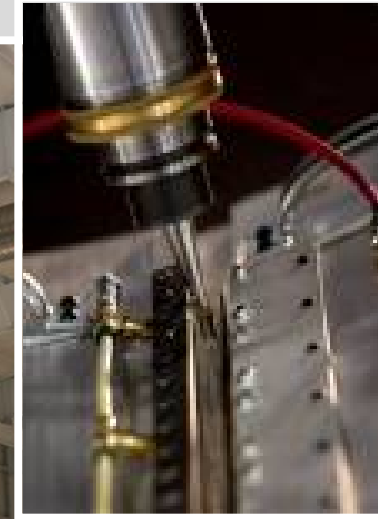

- 2008: Eclipse Aviation goes bankrupt - 1.5 Billion USD invested
- September 2009: private investors acquire all assets of Eclipse Aviation for 40 Million USD. 100% Turkish-owned EA Havacilik A.S. is the second largest investor
- February 2011: Sikorsky Aircraft Corporation invests in Eclipse Aerospace and becomes a major minority shareholder

- IN OCTOBER 2011: Eclipse Aerospace announces production of latest model in the Eclipse jet family, the Eclipse 550; ALP HAVACILIK is selected as one of the suppliers.
- Eclipse Aerospace is supporting a fleet of 260 Eclipse 500 aircraft globally
- Strong balance sheet, ZERO DEBT and positive EBITDA

Eclipse 500

- Eclipse 500 is the most efficient, the most silent and least carbon emitting jet ever produced
- Coupled with state of the art electronic equipment for groundbreaking human machine interface.
- Includes many innovations such as the patented friction stir welding

Friction Stir Welding

TECHNOLOGY

- Employing the latest in avionics technology that can only be found in long-range corporate jets such as the Gulfstream 550, the Eclipse jet is not only the lightest and most economic twin engine jet but also the most technologically advanced single pilot twin-jet engine aircraft ever produced.

Primary Assembly

SERVICE AND MAINTENANCE

Help return the existing fleet to service – Service Division

Eclipse Platinum Service Center Istanbul
